

Adult Education Report—December 2017

Enrollment Update

We continue to exceed last year's enrollment pace. As of mid-November, we are at 68% of our enrollment goal for the year. The additional sections of ESL classes we have offered across the region is a large factor in this number, as we have served over 400 ESL students with 12 hours or more of class since the start of the program year on July 1st.

Changes in Service Sites

With the continued demand for ESL classes, we have temporarily suspended our ESL programming at IowaWorks as of the end of October. During the nearly three years we have been offering classes at the One-Stop, our attendance has been low, averaging 1 to 2 students per class session. We have instead reassigned our instructor to the KLIFE building and we are seeing 10 to 12 students attending each day for classes. We will monitor the situation and continue to watch for the demand for ESL classes at IowaWorks.

HSED Options Update

Since the last RWDB board meeting, the proposed rules to implement HF473, which expands high school equivalency diploma options, continue to make their way through the rulemaking process. The initial processes with the State Board of Education and the Legislative Rules Committee have occurred with the proposed rules being approved for the initial steps. The rules now go back to the state Board of Education in January. If they receive final approval, the proposed effective date is March 1, 2018. The Department of Education will begin working on rule implementation soon and will be convening committees to assist with that process.

New Statewide Data System

Adult Education staff from across the state met in Des Moines on Tuesday, November 7th, to provide input for the adult education modules for Geographic Solutions. We learned more about the features of the system and provided input on the data needs of adult education. Titles I, II, and III are currently scheduled to use this joint system with an anticipated launch date of July 1, 2018.

WIOA Partner Retreat

Adult education staff participated with our WIOA partners in a day-long retreat at Camp Wapsie on Monday, October 9th. Participants were split into teams representing each of our core partner programs, focusing the day on teambuilding via survival skills. Groups participated in activities such as tracking down supplies using GPS units and building temporary shelters. We have received many positive comments on the day.
